

DOCUMENT 02 · WORKING CATALOGUE

Partner Revenue OS

The 200-Driver Catalogue

A working, filterable register of every market force and strategic lever

The operational tracker. 200 growth drivers — every market force, strategic lever, and hybrid — listed with their economic mechanism, KPI signal, product mapping, time horizon, and impact rating. Two blank columns (Priority 1–5; Notes / Owner) turn it into a working prioritisation register. The companion spreadsheet (delivered separately) is filterable and live-summed by category, type, horizon, and impact; this PDF is its read-only reference form.

Partner Revenue OS

Growth-Driver Catalogue — 200 Market Forces & Strategic Levers

Confidential strategy reference · May 2026

Purpose

What this is

A working catalogue of 200 growth drivers for Partner Revenue OS — exogenous market forces and endogenous strategic levers — each with the economic rationale for why it drives growth, a quantitative signal to track it, and a mapping to the product (PDR phase / object / layer).

How to use

Filter the Catalogue tab by Category, Type, Horizon, or Impact. Use the blank 'Priority (1-5)' and 'Notes / Owner' columns to score and assign. Sort by Impact + Horizon to build a sequenced roadmap. The Category Summary tab counts items live by every dimension.

Column definitions (Catalogue tab)

ID	Stable reference code (G001–G200), grouped by category.
Category	One of 16 thematic clusters (see Category Summary).
Force / Lever	The growth driver, stated concisely.
Type	Market force (exogenous tailwind), Strategic lever (endogenous action), or Hybrid.
Growth Mechanism & Rationale	WHY it drives growth — the economic mechanism, not a slogan.
Quantitative Signal / KPI	The number or metric that proves or tracks the driver.
Product Mapping (PDR)	Where it lives in the product: phase, object, integration, or layer.
Horizon	When it binds: Now, 6–18 mo, or 18 mo+.
Impact	High (direct growth), Medium (supporting), Foundational (enabling infrastructure / moat).
Priority (1-5)	Blank — your prioritization input.
Notes / Owner	Blank — your working notes / owner assignment.

Legend

Type	Market force = a trend you ride; Strategic lever = an action you take; Hybrid = both.
Impact colour	High (green) · Medium (amber) · Foundational (blue) on the Impact cell.

Sources & method

Primary data	Salesforce State of Sales, 7th Edition (4,050 respondents, 22 countries). Partner Revenue OS PDR v3 and Advanced Ecosystem Attribution Hub for product mapping.
External figures	Omdia (marketplace forecasts); Forrester (partner-ecosystem 2025); Crossbeam/Pavilion (ecosystem-led growth); public AppExchange/Slack/SaaS retention data; PRM market estimates. Figures are decision-framing estimates, not audited results.
Economic frameworks	Coase; Williamson; Klein–Crawford–Alchian; Hart–Moore; Brandenburger–Stuart; Brandenburger–Nalebuff; Milgrom–Roberts; Rochet–Tirole; Parker–Van Alstyne; Iansiti–Levien; Shapley; Ostrom; Akerlof; folk theorem of repeated games.

ID	Category	Force / Lever	Type	Growth Mechanism & Rationale	Quantitative Signal / KPI	Product Mapping (PDR)	Horizon	Impact	Priority (1-5)	Notes / Owner
G001	A. Macro & Demand-Side Forces	AI agent supply shock	Market force	Agents collapse the marginal cost of generating sales activity, so scarcity shifts downstream to adjudicating contribution — the exact place the product sits. Being downstream of a cost collapse is the	Agent-generated leads/opps per rep (Salesforce: 130k leads → 3.2k opps in 4 months; 10x	Claim Ledger; Attribution Hub	Now	High		
G002	A. Macro & Demand-Side Forces	Usage-pricing transition	Market force	Revenue becomes a continuous flow, breaking one-time partner payout and mandating continuous attribution; only a continuous	% revenue usage-priced; 76% say more important YoY	Revenue Event; continuous eligibility	Now	High		
G003	A. Macro & Demand-Side Forces	Partner-selling saturation	Market force	Partner selling crossed from tactic to infrastructure (86% → 94% in one year); when a capability becomes universal, value migrates from	% firms using partner selling; 89% say increasingly important	Whole platform	Now	High		
G004	A. Macro & Demand-Side Forces	Marketplace procurement migration	Market force	Enterprise software moving onto hyperscaler marketplaces makes every transaction a co-sell attribution event; procurement-channel	Marketplace software ~\$30B → \$163B by 2030 (~29%	Marketplace integration; co-sell claims	Now	High		
G005	A. Macro & Demand-Side Forces	Tech-stack consolidation wave	Market force	84% plan to consolidate; the wave punishes a ninth tool but rewards a control layer that unifies the existing tools and trapped data.	Tools per team (avg 8); 42% of reps overwhelmed	Overlay posture; integration layer	Now	High		
G006	A. Macro & Demand-Side Forces	Partners armed with AI	Market force	Firms give partners AI access (40% full / 55% partial), propagating the activity explosion into the partner base so contribution volume	% partners with AI-tool access	Multi-touch attribution (Phase 13)	Now	High		
G007	A. Macro & Demand-Side Forces	Capital-efficiency era	Market force	Post-2022 discipline rewards the lowest-CAC channel; partner-led growth is it, raising CFO demand for hard proof of partner ROI.	Partner CAC vs direct CAC; Rule-of-40	Partner P&L (Phase 21)	Now	High		
G008	A. Macro & Demand-Side Forces	Buyer trust migrating to third parties	Market force	Buyers trust peers and partners over vendors (35% of younger buyers involve 10+ external voices, rising toward 50%), making	External voices per deal	Touchpoint Ledger (Phase 9)	Now	Medium		
G009	A. Macro & Demand-Side Forces	Lengthening, multi-party sales cycles	Market force	Longer cycles (57% say buyers take longer) mean more touchpoints and more multi-party influence per deal — i.e., more to attribute.	Avg cycle length; touchpoints per deal	Journey Timeline	6–18 mo	Medium		
G010	A. Macro & Demand-Side Forces	Data-quality ceiling on AI	Market force	AI and agents fail without clean unified data (46% say data issues hurt sales; ~19% of data inaccessible), creating demand for a clean	Duplicate rate; match confidence	Identity Resolution Engine	Now	High		
G011	A. Macro & Demand-Side Forces	Rising ROI & personalization demands	Market force	Customers demand provable ROI and personalization (69% / 67%), which partners help deliver, raising the strategic value of governed	% deals requiring ROI proof	Program thesis (Phase 1)	6–18 mo	Medium		
G012	A. Macro & Demand-Side Forces	Global partner-ecosystem expansion	Market force	A majority of decision-makers expect ecosystems to grow across every partner type; 67% expect indirect revenue to grow >30% YoY,	Indirect-revenue growth rate	Whole platform	Now	High		
G013	A. Macro & Demand-Side Forces	Integration-density retention effect	Market force	Integration density lowers churn (product + 4 integrations ~58% lower churn; 7–10x retention for 5+ apps), turning ecosystems into a	Ecosystem NRR gap (typically 10–15 pts)	Partner P&L retention attribution	6–18 mo	High		
G014	A. Macro & Demand-Side Forces	Agentic-commerce emergence	Market force	AI agents beginning to transact and intermediate create a novel attribution problem (agent-as-partner) the product is positioned to	% agent-mediated transactions	Ecosystem Actor Registry	18 mo+	Medium		
G015	A. Macro & Demand-Side Forces	Sales-capacity & coaching scarcity	Market force	Reps lack bandwidth and coaching (47% lack outreach bandwidth); partners and agents fill the gap, increasing partner-mediated activity	Rep capacity utilization	Touchpoint Ledger	6–18 mo	Medium		
G016	A. Macro & Demand-Side Forces	Buyer-side vendor consolidation	Market force	Buyers consolidating vendors favor platforms that can evidence ecosystem value, advantaging firms that prove partner contribution	Vendors per buyer; renewal rate	Partner P&L; exec pack	6–18 mo	Medium		
G017	B. Partnership Revenue Business-Model Forces	Margin → recurring revenue share	Market force	Subscription and usage shift partner pay from one-time margin to a recurring cut, turning a payout event into a payout process only a	% partners on recurring share	Agreement Rule Engine; Revenue Event	Now	High		
G018	B. Partnership Revenue Business-Model Forces	Marketplace private offer as contract vehicle	Market force	Private offers carry take-rate and drawdown terms, so revenue share must be computed on the correct net base or it generates disputes.	% deals via private offer; take rate ~3%	Marketplace integration; revenue-base rule	Now	High		
G019	B. Partnership Revenue Business-Model Forces	Reseller disintermediation	Market force	Self-serve procurement compresses resale margin; pay migrates from transacting to influencing, requiring attribution of non-	Resale-margin trend; influence-fee share	Influence attribution; role taxonomy	Now	High		
G020	B. Partnership Revenue Business-Model Forces	Outcome-based partner compensation	Market force	Vendors increasingly pay on realized consumption / retention / NRR, requiring payout linked to ongoing validated events rather than	Payout-to-realized-revenue ratio	Revenue Event statuses; eligibility	6–18 mo	High		
G021	B. Partnership Revenue Business-Model Forces	Embedded-finance settlement rails	Market force	Programmatic and instant payout collapse per-payout cost, making high-frequency micro-attribution models viable and expanding payout	Cost per payout; payout frequency	Settlement; payment-rail integration	6–18 mo	Medium		
G022	B. Partnership Revenue Business-Model Forces	Rev-rec & e-invoicing regulation	Market force	ASC 606 / IFRS 15 plus e-invoicing and withholding mandates (ZATCA, EU) push partner revenue into finance and compliance	# jurisdictions with mandates	Finance Evidence Pack; ERP integration	Now	High		
G023	B. Partnership Revenue Business-Model Forces	Capital-markets repricing of ecosystem revenue	Market force	Investors price partner-sourced vs influenced revenue and ecosystem NRR, making clean attribution a valuation lever, not just	Valuation premium for partner-revenue quality	Partner P&L; exec pack	6–18 mo	High		
G024	B. Partnership Revenue Business-Model Forces	Multi-motion unbundling	Market force	One account is touched by PLG, direct sales, partners, and community at once; attribution must span motions, not just partners.	Motions per account	Touchpoint Ledger across motions	6–18 mo	High		
G025	B. Partnership Revenue Business-Model Forces	Co-sell as a board-level KPI	Market force	Marketplace ARR % and co-sell influence are now reported metrics, pulling partner attribution into executive and board reporting.	Marketplace ARR % (target 20–30%)	Exec pack (Phase 22)	Now	Medium		
G026	B. Partnership Revenue Business-Model Forces	Hyperscaler co-sell program expansion	Market force	AWS/Azure/GCP are expanding co-sell access (e.g., AWS opened SaaS co-sell to all ISV Accelerate partners), flooding firms with co-	# co-sell registrations	Marketplace / co-sell claims	Now	High		
G027	B. Partnership Revenue Business-Model Forces	Committed cloud budget pools (EDP)	Market force	\$400B+ committed cloud spend makes marketplace the path of least resistance, accelerating co-sell volume and base-of-payment	Committed-spend drawdown	Revenue-base rule; marketplace	Now	Medium		
G028	B. Partnership Revenue Business-Model Forces	Partner-base M&A churn	Market force	Partners consolidate via M&A, changing entitlements and protection; firms need a system that ports and retires entitlements cleanly.	Partner M&A events / yr	Partner Operating Layer; agreement versioning	18 mo+	Medium		
G029	B. Partnership Revenue Business-Model Forces	Influence-fee normalization	Hybrid	As influence (not resale) becomes payable, firms need a standard way to price and pay influence — a new compensation category the	Influence-fee deal share	Attribution-to-Eligibility Bridge	6–18 mo	Medium		
G030	B. Partnership Revenue Business-Model Forces	Co-innovation / build-with royalties	Market force	Platform co-innovation creates shared-IP revenue requiring multi-party royalty splits the product can adjudicate.	# build-with deals	Credit Allocation; royalty rules	18 mo+	Medium		
G031	B. Partnership Revenue Business-Model Forces	Embedded / OEM / white-label growth	Market force	The embedded-software economy creates usage-metered royalty models needing metered attribution.	Embedded-revenue share	Usage-royalty rules	18 mo+	Medium		
G032	B. Partnership Revenue Business-Model Forces	Affiliate / performance model spread	Market force	Digital routes to market and PLG normalize CPA/CPL partner pay, requiring event-triggered micro-payout at scale.	# performance partners	Event-triggered payout	6–18 mo	Medium		
G033	C. Value Creation, Capture & Orchestration	Value-created pricing frame	Strategic lever	Pricing on governed partner revenue rather than seats uncaps ACV and moves the sale to the CRO/CFO; value created is bounded by	Price as % of governed revenue; ACV	Commercial model; Partner P&L	6–18 mo	High		
G034	C. Value Creation, Capture & Orchestration	Four-way separation of capture	Strategic lever	Separating contribution / attribution / commercial eligibility / payout prevents over- and under-payment and lets firms recognize more	Leakage recovered (10–30% of payout)	Phases 12 / 16 / 18	Now	High		
G035	C. Value Creation, Capture & Orchestration	Keystone / orchestrator positioning	Strategic lever	Owning the coordination chokepoint captures durable rents and immunizes the product against consolidation pressure.	NRR 120%+; expansion steps	Governance & Cadence layer	6–18 mo	High		

ID	Category	Force / Lever	Type	Growth Mechanism & Rationale	Quantitative Signal / KPI	Product Mapping (PDR)	Horizon	Impact	Priority (1-5)	Notes / Owner
G036	C. Value Creation, Capture & Orchestration	Unclaimed-influence monetization	Strategic lever	Capturing pre-claim influence creates a market for a previously non-traded good, roughly doubling the measurable surface rather than	Unclaimed influence detected	Touchpoint Ledger (Phase 9)	6–18 mo	High		
G037	C. Value Creation, Capture & Orchestration	Recognition as cheap currency	Strategic lever	Strategic credit (recognition) is near-free and buys loyalty; separating it from payout lets firms scale goodwill cheaply.	Recognized-vs-paid partner ratio	Attribution Statement	6–18 mo	Medium		
G038	C. Value Creation, Capture & Orchestration	Cross-side surplus orchestration	Strategic lever	Internalizing externalities across vendor / partner / customer grows total value and stabilizes the split, reducing conflict.	Channel-conflict rate	Platform governance	18 mo+	Medium		
G039	C. Value Creation, Capture & Orchestration	Willingness-to-pay expansion	Strategic lever	Partner endorsement raises customer WTP; measuring it lets firms increase their market effect.	Win-rate lift on partner-invoiced deals	Partner P&L	6–18 mo	Medium		
G040	C. Value Creation, Capture & Orchestration	Partner opportunity-cost reduction	Strategic lever	Lowering partners' cost to participate (clear rules, fast payout)	Time-to-first-accepted-claim	Onboarding; statements	Now	Medium		
G041	C. Value Creation, Capture & Orchestration	Value-architecture mapping	Strategic lever	Mapping who creates value at which journey stage directs investment to the highest-value sales.	Contribution by journey stage	Journey-stage mapping	6–18 mo	Medium		
G042	C. Value Creation, Capture & Orchestration	Bundled co-created value	Strategic lever	Bundling co-created partner value into the customer offer raises retention and expands the market.	Integration density; ecosystem NPD	Partner P&L	18 mo+	Medium		
G043	C. Value Creation, Capture & Orchestration	Shadow-revenue / value-leak detection	Strategic lever	Surfacing value created but not captured (shadow revenue) is a direct high-margin growth find.	Shadow-revenue report	Intelligence layer	6–18 mo	Medium		
G044	C. Value Creation, Capture & Orchestration	Orchestration habit formation	Strategic lever	Embedding the cadence makes the product the way decisions are made, creating ritual-based switching costs.	Exec-pack adoption; governance MAU	Cadence layer (Part E)	6–18 mo	High		
G045	D. Game Theory & Incentive Design	Hold-up problem solved (credible commitment)	Strategic lever	Protection, audit, and version-locked rules are bonds that prevent ex-post expropriation, which causes partners to raise relationship-	Repeat-claim rate; specific-investment proxies	Protection Engine; Audit Log	Now	High		
G046	D. Game Theory & Incentive Design	Shapley-style fair allocation	Strategic lever	Marginal-contribution allocation is axiomatically fair and aligns credit with value, defeating arbitrary first/last-touch that distorts incentives.	Attribution dispute rate	Contribution Scoring (Phase 13)	6–18 mo	High		
G047	D. Game Theory & Incentive Design	Repeated-game cooperation (observable history)	Strategic lever	The audit trail and visible statements make history observable, which is the precondition for the cooperate-cooperate equilibrium to hold.	Dispute recurrence; partner retention	Audit Log; Statements	Now	High		
G048	D. Game Theory & Incentive Design	Free-rider problem fix	Strategic lever	Crisp multi-touch credit converts the public good of a shared deal into private attributable contributions, restoring each partner's	Multi-partner attribution rate vs deal size	Credit Allocation	6–18 mo	High		
G049	D. Game Theory & Incentive Design	Commons enclosure via protection	Strategic lever	Time-bound protection windows enclose the account commons, stopping the over-grazing that produces channel conflict.	Protection utilization; conflict escalations	Protection Engine	Now	High		
G050	D. Game Theory & Incentive Design	Influence decay (anti-rent)	Strategic lever	Decay prevents protection from over-crediting staple influence, keeping allocation fair over time and avoiding perpetual rents.	Decay-adjusted credit share	Influence Decay Record	6–18 mo	Medium		
G051	D. Game Theory & Incentive Design	Screening at qualification (adverse selection)	Strategic lever	Fit and risk scoring separate good partners from lemons before they impose onboarding, support, and payout cost.	Qualification-to-approval rate; portfolio bloat	Qualification scoring (Phase 4)	Now	Medium		
G052	D. Game Theory & Incentive Design	Monitoring via evidence (moral hazard)	Strategic lever	Evidence requirements make hidden non-contribution costly to fake, keeping the relationship incentive-compatible.	Evidence completeness; claim acceptance	Evidence layer	Now	Medium		
G053	D. Game Theory & Incentive Design	Costly-signal tiers (signaling)	Strategic lever	Tiers that demand relationship-specific investment in exchange for protection/payout make partners reveal their true type.	Active-to-producing ratio	Partner Tier; approval logic	6–18 mo	Medium		
G054	D. Game Theory & Incentive Design	Coopetition adjudication	Strategic lever	Neutral adjudication of partners who both compete and complement captures the highest-conflict, highest-value deals.	Coopetitive-deal dispute rate	Role taxonomy; Conflict Detection	6–18 mo	High		
G055	D. Game Theory & Incentive Design	Backward-induction onboarding	Strategic lever	Showing the terminal payoff early (rulebook, protection, statement at activation) shifts period-one partner investment upward.	Time-to-first-accepted-claim	Onboarding surfaces rulebook (Phase 8)	Now	Medium		
G056	D. Game Theory & Incentive Design	Mechanism-design payout (incentive compatibility)	Strategic lever	Designing payout so truthful claiming is the partner's best move reduces gaming and over-claiming.	Over-claim / duplicate rate	Preflight + eligibility rules	6–18 mo	Medium		
G057	D. Game Theory & Incentive Design	Proactive conflict detection	Strategic lever	Flagging likely disputes before escalation preserves the cooperative equilibrium cheaply — preventing defection beats punishing it.	Disputes prevented vs raised	Conflict Signal object	6–18 mo	Medium		
G058	D. Game Theory & Incentive Design	Defensible multi-party splits	Strategic lever	A principled split logic for coalition deals reduces bargaining friction and speeds deal completion.	Split-acceptance rate	Credit Allocation	18 mo+	Medium		
G059	E. Attribution & Multi-Partner Credit	Multi-touch as category-defining capability	Strategic lever	As deals become multi-touch, single-touch becomes provably wrong; owning multi-touch owns the high ground finance will not concede to	% multi-touch deals	Phase 13	6–18 mo	High		
G060	E. Attribution & Multi-Partner Credit	Identity-resolution moat	Strategic lever	Cross-system entity matching compounds with data, creating a network-effect moat a new entrant cannot replicate without the	Match confidence; duplicate rate	Identity Resolution Engine	Now	High		
G061	E. Attribution & Multi-Partner Credit	AI recommender + human accountability	Strategic lever	AI does matching and scoring; humans decide payout — the only posture finance and legal trust for money movement, and a sales	Adjudication labor cut 50–70%	Attribution Recommendation + approval gates	Now	High		
G062	E. Attribution & Multi-Partner Credit	Explainable attribution	Strategic lever	Transparent scoring turns a potential black-box liability into trust; in attribution, explainability is the product.	Attribution acceptance rate	Scoring transparency	6–18 mo	High		
G063	E. Attribution & Multi-Partner Credit	Evidence-reliability scoring	Strategic lever	Scoring evidence quality lets weak claims be down-weighted rather than rejected, improving fairness and acceptance.	Evidence-reliability distribution	Evidence Provenance	6–18 mo	Medium		
G064	E. Attribution & Multi-Partner Credit	Confidence-banded credit	Strategic lever	Expressing credit with confidence bands avoids false precision and routes low-confidence matches to review.	Low-confidence match rate	Contribution Score	6–18 mo	Medium		
G065	E. Attribution & Multi-Partner Credit	Journey-stage attribution	Strategic lever	Crediting by journey stage reveals which partners drive which expansion, retention, investment, and repeat.	Influence by journey stage	Journey Timeline	6–18 mo	Medium		
G066	E. Attribution & Multi-Partner Credit	Cross-motion attribution	Strategic lever	Netting partner influence out of PLG / direct / community measures partner value correctly; ignoring other motions misstates it both	Motion-adjusted partner credit	Touchpoint Ledger across motions	6–18 mo	High		
G067	E. Attribution & Multi-Partner Credit	Pre-opportunity (marketing) attribution	Strategic lever	Capturing partner influence before an opportunity exists extends attribution upstream where much partner value sits.	Pre-opportunity touchpoints	Marketing integration (Phase 26)	6–18 mo	Medium		
G068	E. Attribution & Multi-Partner Credit	Post-sale attribution	Strategic lever	Crediting implementation, renewal, and expansion captures where value is realized.	Post-sale touchpoints;	CS integration (Phase 28)	6–18 mo	High		
G069	E. Attribution & Multi-Partner Credit	Duplicate-claim prevention	Strategic lever	Early duplicate detection prevents downstream payout error and customer conflict.	Duplicate-claim rate	Preflight (Phase 11)	Now	Medium		
G070	E. Attribution & Multi-Partner Credit	Attribution-to-eligibility bridge	Strategic lever	Mapping recognized contribution to commercial rights cleanly separates credit from money, preventing the most common	Eligibility-explanation completeness	Attribution-to-Eligibility Record	6–18 mo	Medium		
G071	E. Attribution & Multi-Partner Credit	Model versioning & auditability	Strategic lever	Versioned attribution models make decisions defensible in audit and reproducible over time.	Model-version traceability	Audit Log	6–18 mo	Medium		
G072	E. Attribution & Multi-Partner Credit	Recommendation acceptance loop	Strategic lever	Human accept/adjust feedback continuously improves the model, compounding accuracy into a durable advantage.	Override-rate trend	Attribution Recommendation Engine	18 mo+	Medium		
G073	F. Co-Sell & Motion Restructuring	Co-sell as the land wedge	Strategic lever	The highest-volume, highest-conflict, most-manual motion is the sharpest pain with a budgeted buyer — the ideal entry point.	Manual co-sell tax (~15 min/deal)	Co-sell claims; MVP	Now	High		
G074	F. Co-Sell & Motion Restructuring	Deal-registration → governed claim	Strategic lever	Replacing first-to-register land-grab with contribution-based claims aligns the optimization target with value created.	Duplicate-claim rate; win rate	Phase 10	6–18 mo	High		

ID	Category	Force / Lever	Type	Growth Mechanism & Rationale	Quantitative Signal / KPI	Product Mapping (PDR)	Horizon	Impact	Priority (1-5)	Notes / Owner
G075	F. Co-Sell & Motion Restructuring	Hyperscaler field-team	Strategic lever	Making partner context visible to hyperscaler reps accelerates co-sell	Co-sell attach rate; cycle time	CRM write-back; marketplace	6–18 mo	Medium		
G076	F. Co-Sell & Motion Restructuring	Private-offer workflow	Strategic lever	Automating private-offer creation and sync removes friction and	Time-to-offer; offer-error rate	Marketplace integration	6–18 mo	Medium		
G077	F. Co-Sell & Motion Restructuring	Co-sell ROI proof to the CRO	Strategic lever	Proving co-sell influence (faster, higher-converting deals) earns the budget to scale the alliances function.	Partner-influenced deals ~35% faster, ~58% higher conversion	Partner P&L	6–18 mo	Medium		
G078	F. Co-Sell & Motion Restructuring	Cross-cloud co-sell	Strategic lever	One neutral view across AWS/Azure/GCP co-sell that no single	Multi-cloud co-sell coverage	Identity resolution +	6–18 mo	High		
G079	F. Co-Sell & Motion Restructuring	Co-sell queue / SLA	Strategic lever	Fast co-sell review queues prevent stalled deals and partner	Time-in-preflight; co-sell aging	Exception queue (Phase 11)	Now	Medium		
G080	F. Co-Sell & Motion Restructuring	Warm-introduction capture	Strategic lever	Logging partner warm intros as touchpoints converts informal help	Intro touchpoints; intro-to-opp	Touchpoint Ledger	6–18 mo	Medium		
G081	F. Co-Sell & Motion Restructuring	Co-sell-to-marketplace	Strategic lever	Linking co-sell pipeline to marketplace transaction closes the loop	Co-sell → marketplace	Marketplace + Revenue	6–18 mo	Medium		
G082	F. Co-Sell & Motion Restructuring	Lightweight sales	Strategic lever	A low-friction sales confirmation of partner involvement improves	Sales-confirmation rate	Sales confirm (Phase 12)	Now	Medium		
G083	F. Co-Sell & Motion Restructuring	Channel-conflict resolution	Strategic lever	A defined motion to resolve direct-vs-partner conflict protects both	Conflict escalations resolved	Dispute + protection	6–18 mo	Medium		
G084	F. Co-Sell & Motion Restructuring	Co-sell incentive transparency	Strategic lever	Showing partners co-sell economics upfront raises co-sell	Co-sell participation rate	Statements; rulebook	6–18 mo	Medium		
G085	G. Lifecycle & Continuous Value	Continuous attribution engine	Strategic lever	Usage pricing demands streaming attribution; continuous-native firms are the only ones whose numbers stay correct, capturing the	Time from revenue event to eligibility	Event-driven loop	Now	High		
G086	G. Lifecycle & Continuous Value	Lifecycle ownership (post-sale credit)	Strategic lever	Crediting adoption, retention, and expansion re-routes partner effort toward the value that compounds under usage pricing.	Post-sale attributed revenue	CS integration; revenue statuses	6–18 mo	High		
G087	G. Lifecycle & Continuous Value	Continuous partner statements	Strategic lever	Near-real-time statements remove the quarter-end payout scramble and deepen partner trust continuously.	Statement-issuance latency	Phase 18	6–18 mo	Medium		
G088	G. Lifecycle & Continuous Value	Renewal-influence attribution	Strategic lever	Crediting renewal influence aligns partners to retention — the usage-	Renewal-attributed revenue	Revenue Event (renewed)	6–18 mo	Medium		
G089	G. Lifecycle & Continuous Value	Expansion-influence	Strategic lever	Crediting expansion and upsell captures the NRR-driving partner	Expansion-attributed revenue	Revenue Event (expanded)	6–18 mo	Medium		
G090	G. Lifecycle & Continuous Value	Contraction / churn	Strategic lever	Reducing payout on contracted or churned revenue prevents over-	Clawback / adjustment rate	Revenue Event (contracted)	6–18 mo	Medium		
G091	G. Lifecycle & Continuous Value	Implementation-quality signal	Strategic lever	Tracking implementation-partner quality links it to retention, justifying	Implementation → retention	CS integration	18 mo+	Medium		
G092	G. Lifecycle & Continuous Value	Consumption-tracking attribution	Strategic lever	Tying credit to tracked consumption solves the usage-pricing visibility gap that partners and finance both face.	Usage-tracking coverage	Billing integration; Revenue Event	6–18 mo	Medium		
G093	G. Lifecycle & Continuous Value	Customer-health-linked	Strategic lever	Connecting partner involvement to customer health score reveals	Health-score lift on partner	CS integration; Partner P&L	18 mo+	Medium		
G094	G. Lifecycle & Continuous Value	Continuous eligibility	Strategic lever	Recomputing eligibility as revenue moves keeps payout accurate	Eligibility-recompute frequency	Phase 16	6–18 mo	Medium		
G095	G. Lifecycle & Continuous Value	Lifecycle cadence rituals	Strategic lever	A daily-to-quarterly cadence across the lifecycle embeds the product in operations and creates switching cost.	Cadence adoption depth	Part E cadence	6–18 mo	Medium		
G096	G. Lifecycle & Continuous Value	Continuous value reporting to	Strategic lever	Showing the customer ongoing partner-driven value funds continued	Ecosystem NRR reported	Exec pack	18 mo+	Medium		
G097	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Hyperscaler marketplace wave	Hybrid	Ride the marketplace migration as the primary growth vector; it changes how money is allowed to move, the most durable kind of	Marketplace GMV; 20–30% marketplace ARR	Marketplace integration	Now	High		
G098	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Neutral multi-cloud Switzerland	Strategic lever	A neutral cross-hyperscaler attribution view is a position no structurally conflicted hyperscaler can hold — one of the strongest	Multi-cloud coverage	Identity resolution	6–18 mo	High		
G099	H. Ecosystem Position (Hyperscaler / GSI / ISV)	GSI lifecycle attribution	Strategic lever	GSIs span influence — implement — expand on one account; fair coalition credit on multi-year usage-priced deals is the hardest,	GSI deal size; GSI dispute rate	Multi-touch + role taxonomy	6–18 mo	High		
G100	H. Ecosystem Position (Hyperscaler / GSI / ISV)	ISV co-sell enablement	Strategic lever	Serving ISV co-sell on marketplaces captures the fastest-growing partner tve.	ISV co-sell volume	Co-sell claims	Now	Medium		
G101	H. Ecosystem Position (Hyperscaler / GSI / ISV)	SaaS-flywheel instrumentation	Strategic lever	Measuring which integrations drive retention makes the ecosystem flywheel manageable rather than hoped-for.	Ecosystem NRR gap	Partner P&L	6–18 mo	High		
G102	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Procurement-cycle compression leverage	Strategic lever	Faster marketplace procurement raises transactions per period, and the product's value scales with transaction velocity.	Attribution events per period	Billing / ERP	Now	Medium		
G103	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Marketplace listing performance tie-in	Strategic lever	Linking listing performance to partner attribution closes the discovery-to-revenue loop.	Listing → transaction rate	Marketplace integration	18 mo+	Medium		
G104	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Distributor / aggregator support	Strategic lever	Supporting distributor tiers captures the multi-layer channel still large in many regions.	Distributor-attributed revenue	Role taxonomy	6–18 mo	Medium		
G105	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Agency / consultant partner support	Strategic lever	Agencies and consultants are growing digital routes to market needing influence attribution.	Agency-attributed influence	Role taxonomy; touchpoints	6–18 mo	Medium		
G106	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Embedded-platform partner support	Strategic lever	Supporting embedded and OEM partners captures usage-royalty economics.	Embedded-royalty revenue	Usage-royalty rules	18 mo+	Medium		
G107	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Regional strategic-partner support	Strategic lever	Region-specific partners (banks, government programs in GCC/MENA) need compliant, localized governance global tools miss	Regional partner coverage	Compliance layer; role taxonomy	6–18 mo	Medium		
G108	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Alliance-team enablement	Strategic lever	Equipping the alliances team (the natural champion) with proof and queues drives adoption and renewal.	Alliance-team active usage	Cadence; dashboards	Now	Medium		
G109	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Marketplace incentive / MDF capture	Strategic lever	Capturing hyperscaler incentive and MDF tied to co-sell adds an attributable revenue and credit stream.	Incentive / MDF captured	Revenue Event; evidence	18 mo+	Medium		
G110	H. Ecosystem Position (Hyperscaler / GSI / ISV)	Ecosystem actor graph	Strategic lever	Modeling all actors (partners, contacts, internal, platform) enables relationship-aware attribution beyond simple partner records.	Graph coverage	Ecosystem Actor Registry; Relationship Edge	6–18 mo	Medium		
G111	I. Program Design, Tiers & Incentives	Contribution-based program redesign	Strategic lever	Redesigning programs around measured contribution aligns reward with value and makes the ledger indispensable — selling the	Payout-waste reduction	Phase 1/2; exec decision	6–18 mo	High		
G112	I. Program Design, Tiers & Incentives	Self-selection tier menu	Strategic lever	A menu of rights and obligations makes partners reveal their true type, solving adverse selection automatically.	Active-to-producing ratio	Tiers; approval	6–18 mo	Medium		
G113	I. Program Design, Tiers & Incentives	Dynamic incentive simulation	Strategic lever	What-if simulation sets incentives by modeled elasticity rather than guesswork, reducing the cost of incentive errors.	Incentive-error cost avoided	Incentive Simulation (V3)	18 mo+	Medium		
G114	I. Program Design, Tiers & Incentives	Role-based attribution rules	Strategic lever	Different roles get different attribution, evidence, and protection logic, preventing wrong payouts and partner conflict.	Claim acceptance by role	Role taxonomy (Phase 2)	Now	Medium		
G115	I. Program Design, Tiers & Incentives	Program-thesis governance	Strategic lever	Forcing each program to a clear commercial reason prevents random partner activity and makes the function measurable.	% partners attached to a program	Phase 1	Now	Medium		
G116	I. Program Design, Tiers & Incentives	Tier-linked protection &	Strategic lever	Tying protection and payout to tier rewards investment and motivates	Tier-progression rate	Tiers; protection	6–18 mo	Medium		

ID	Category	Force / Lever	Type	Growth Mechanism & Rationale	Quantitative Signal / KPI	Product Mapping (PDR)	Horizon	Impact	Priority (1-5)	Notes / Owner
G117	I. Program Design, Tiers & Incentives	Incentive transparency to partners	Strategic lever	Showing how pay is calculated raises trust and participation (reps want this too; 76% want comp transparency).	Comp-transparency satisfaction	Statements	6–18 mo	Medium		
G118	I. Program Design, Tiers & Incentives	Concentration-risk management	Strategic lever	Surfacing partner concentration risk guides diversification and protects revenue from single-partner dependence.	Partner concentration index	Partner P&L	6–18 mo	Medium		
G119	I. Program Design, Tiers & Incentives	Underperformer watchlist & action	Strategic lever	Identifying and acting on weak partners reduces portfolio cost and focus investment on high performers.	Watchlist actions completed	Phase 21/22	6–18 mo	Medium		
G120	I. Program Design, Tiers & Incentives	Co-marketing / MDF governance	Strategic lever	Governing MDF spend against attributed outcomes improves marketing ROI and removes wasteful spend.	MDF-to-attributed-revenue	Marketing integration; P&L	18 mo+	Medium		
G121	I. Program Design, Tiers & Incentives	Program-profitability analytics	Strategic lever	Program-level P&L reveals which programs to scale, fix, or kill — the case of better capital allocation.	Program profitability	Phase 21	6–18 mo	Medium		
G122	I. Program Design, Tiers & Incentives	Incentive clawback logic	Strategic lever	Clawback on churned or refunded revenue protects the vendor against over-payment under usage models.	Clawback rate	Agreement rules; eligibility	6–18 mo	Medium		
G123	J. Pricing & Monetization	Value-based pricing on governed revenue	Strategic lever	A percentage of governed partner revenue aligns vendor and customer incentives and uncaps ACV; it is also a credible-price.	Price as % of governed revenue; ACV	Commercial model	6–18 mo	High		
G124	J. Pricing & Monetization	Hybrid platform + value pricing	Strategic lever	A platform fee plus a modest value component eases adoption until governed-revenue measurement is unimpeachable.	Pricing mix	Commercial model	Now	Medium		
G125	J. Pricing & Monetization	Module-laddered expansion pricing	Strategic lever	Pricing each complementary module so it unlocks the next's value makes expansion the default (supermodularity), driving NRR.	NRR; module attach rate	Roadmap MVP – V3	6–18 mo	High		
G126	J. Pricing & Monetization	Outcome-based pricing tier	Strategic lever	Charging on outcomes (leakage recovered) is the safest CFO sell because the value is hard-dollar and self-funding.	ROI multiple delivered	Partner P&L proof	6–18 mo	Medium		
G127	J. Pricing & Monetization	Marketplace-transaction pricing	Strategic lever	A small fee on governed marketplace transactions scales the product's revenue with the marketplace migration.	Marketplace transaction volume	Marketplace integration	6–18 mo	Medium		
G128	J. Pricing & Monetization	Finance-tier upsell	Strategic lever	Rev-rec, evidence, and compliance features justify a finance-grade multi-touch and shapley-based pricing.	Finance-tier attach	Evidence pack; ERP	6–18 mo	Medium		
G129	J. Pricing & Monetization	Multi-touch premium tier	Strategic lever	Multi-touch / Shapley attribution is the feature finance will not go without — a premium-priced differentiator.	Multi-touch tier attach	Phase 13	6–18 mo	Medium		
G130	J. Pricing & Monetization	Partner-portal seat pricing	Strategic lever	Modest portal seat pricing captures scaling partner bases without raising core value.	Partner-portal seats	Portal	6–18 mo	Medium		
G131	J. Pricing & Monetization	Regional compliance-module pricing	Strategic lever	Tax and e-invoicing compliance modules priced per jurisdiction maximize adoption.	Compliance-module attach	Compliance layer	18 mo+	Medium		
G132	J. Pricing & Monetization	Governed-data / BI export pricing	Strategic lever	Charging for governed data export to warehouses monetizes the data available beyond trust.	BI-export attach	Data-warehouse export	18 mo+	Medium		
G133	J. Pricing & Monetization	Settlement / payment-rail take	Strategic lever	A small take on programmatic settlement adds a usage-scaled revenue line that grows with payout volume.	Settlement volume	Settlement integration	18 mo+	Medium		
G134	J. Pricing & Monetization	ROI-underwritten / guarantee pricing	Strategic lever	Underwriting leakage-recovery ROI removes buyer risk and accelerates adoption.	Deals closed with ROI guarantee	Partner P&L proof	18 mo+	Medium		
G135	K. Data, Integration & Platform Moats	Identity-resolution data network effect	Strategic lever	Accumulated match history compounds accuracy — the deepest and least visible moat a software company can hold.	Match accuracy over time	Identity Resolution Engine	Now	High		
G136	K. Data, Integration & Platform Moats	Overlay-first integration posture	Strategic lever	A read-first, manual-safe overlay lowers adoption friction in a consolidation-wary market and protects against the ninth-tool trap.	Time-to-value; CSV adoption	Integration layer	Now	High		
G137	K. Data, Integration & Platform Moats	Disciplined CRM write-back	Strategic lever	Selective, controlled write-back gives sales partner context without forcing them into another system.	Write-back adoption; sync errors	Phase 14	Now	Medium		
G138	K. Data, Integration & Platform Moats	Integration health monitoring	Strategic lever	Visible sync health prevents the silent data failure that quietly erodes trust in the system.	Sync success rate; uptime	Integration Health Monitor	6–18 mo	Medium		
G139	K. Data, Integration & Platform Moats	Data-quality engine	Strategic lever	Cleaning duplicates and missing fields raises every downstream number; quality is the substrate everything else stands on.	Data completeness; duplicate rate	Data Quality Engine	Now	Foundational		
G140	K. Data, Integration & Platform Moats	Multi-system revenue-event integration	Strategic lever	Ingesting from billing, ERP, CRM, and marketplace creates a single unified revenue truth.	Revenue-event coverage	Phase 15 integrations	6–18 mo	Medium		
G141	K. Data, Integration & Platform Moats	Data-warehouse export	Strategic lever	Letting governed data flow to BI increases trust and adoption — the data flywheel.	Export adoption	Phase 33	6–18 mo	Medium		
G142	K. Data, Integration & Platform Moats	Event-driven architecture	Strategic lever	An event-driven pattern enables continuous, auditable workflows at scale rather than fragile batch jobs.	Event latency; throughput	Backend pattern (\$37)	6–18 mo	Medium		
G143	K. Data, Integration & Platform Moats	Immutable audit trail	Strategic lever	An immutable audit log is the observable-history substrate for both trust and least-defensibility.	Audit completeness	Audit Log	Now	Foundational		
G144	K. Data, Integration & Platform Moats	Field-level permission & security	Strategic lever	Separating partner-facing and internal data at the field level is trust infrastructure for sensitive economics.	Access-violation incidents	SSO / permission layer	Now	Foundational		
G145	K. Data, Integration & Platform Moats	Marketplace data unification	Strategic lever	Unifying the underreported marketplace motion with claims captures revenue that CRM-only systems miss.	Marketplace-attributed revenue	Marketplace integration (\$27)	6–18 mo	Medium		
G146	K. Data, Integration & Platform Moats	Pre-built connector breadth	Strategic lever	Breadth of native connectors lowers onboarding cost and widens the addressable market.	Connectors live; onboarding time	Integration layer	6–18 mo	Medium		
G147	L. Go-to-Market, Wedge & Land-Expand	Co-sell leakage land wedge	Strategic lever	Enter where pain is hard-dollar (leakage) and the buyer is budgeted (leakage / Buy One).	Pilot leakage recovered	MVP	Now	High		
G148	L. Go-to-Market, Wedge & Land-Expand	Hard-dollar ROI-led selling	Strategic lever	Lead with leakage and labor recovery (the finance-defensible terms), close with the revenue upside — the safest enterprise posture.	ROI multiple in pilot	Partner P&L	Now	High		
G149	L. Go-to-Market, Wedge & Land-Expand	Complementarity-driven expansion	Strategic lever	Modules raise each other's value, making expansion a pull rather than a push and driving net revenue retention.	Expansion rate; NRR	Roadmap	6–18 mo	High		
G150	L. Go-to-Market, Wedge & Land-Expand	Climb-to-CFO motion	Strategic lever	Move from alliances tool to finance-trusted layer to elevate the buyer and across the durable budget.	CFO-sponsored deals	Evidence pack; ERP	6–18 mo	High		
G151	L. Go-to-Market, Wedge & Land-Expand	Program-redesign consulting	Strategic lever	Sell the strategic, sponsored program redesign that makes the ledger indispensable.	Redesign engagements	Phase 1/2	6–18 mo	Medium		
G152	L. Go-to-Market, Wedge & Land-Expand	Unclaimed-influence demo hook	Strategic lever	Show prospects money sitting on their own accounts that they do not measure — the most persuasive demo available.	Demo-to-pilot conversion	Touchpoint Ledger	Now	Medium		
G153	L. Go-to-Market, Wedge & Land-Expand	Marketplace-vendor ICP focus	Strategic lever	Target ISVs scaling marketplace revenue — sharpest pain, budgeted, and fast motion.	ICP win rate	Marketplace	Now	Medium		
G154	L. Go-to-Market, Wedge & Land-Expand	Win one high-conflict motion first	Strategic lever	Win a single painful motion (co-sell) before breadth; speed-to-trusted-ledger beats feature breadth in a hot window.	Time-to-trusted-ledger	MVP	Now	High		
G155	L. Go-to-Market, Wedge & Land-Expand	Reference & community flywheel	Strategic lever	Partner-revenue success stories and community drive credibility (high performers are 3.2x more likely to participate in communities).	References; community participation	GTM	6–18 mo	Medium		
G156	L. Go-to-Market, Wedge & Land-Expand	Regional compliance	Strategic lever	Use ZATCA / EU compliance as a regional beachhead global tools cannot match.	Regional win rate	Compliance layer	6–18 mo	Medium		
G157	L. Go-to-Market, Wedge & Land-Expand	Diligence-grade reporting as a service	Strategic lever	Capital-markets-grade partner-revenue reporting wins CFO- and board-sponsored deals.	Board-sponsored deals	Exec pack	18 mo+	Medium		
G158	L. Go-to-Market, Wedge & Land-Expand	Outcome-proof case studies	Strategic lever	Outcome case studies (not feature lists) survive procurement committees.	Case-study-influenced wins	Partner P&L proof	6–18 mo	Medium		

ID	Category	Force / Lever	Type	Growth Mechanism & Rationale	Quantitative Signal / KPI	Product Mapping (PDR)	Horizon	Impact	Priority (1-5)	Notes / Owner
G159	M. Finance, Compliance & Risk	Finance-grade evidence pack	Strategic lever	Evidence, provenance, and approval history make partner economics defensible to finance and audit — finance trusts	Evidence completeness; audit issues	Phase 17	Now	High		
G160	M. Finance, Compliance & Risk	Revenue-recognition-ready outputs	Strategic lever	Recognition-ready partner economics (ASC 606 / IFRS 15) move the product from a sales-ops tool to a finance system of record.	Close-cycle time; restatement risk	Evidence pack; ERP	6–18 mo	High		
G161	M. Finance, Compliance & Risk	Cross-border tax / withholding handling	Strategic lever	Jurisdiction-aware tax and withholding turns a compliance burden into a competitive advantage	WHT errors avoided	Settlement; ERP	6–18 mo	Medium		
G162	M. Finance, Compliance & Risk	E-invoicing compliance (ZATCA / EU)	Strategic lever	Built-in e-invoicing is a gating requirement in mandated markets — non-optional demand, not a nice-to-have.	# mandated jurisdictions covered	Compliance layer	Now	High		
G163	M. Finance, Compliance & Risk	Payout-liability dashboard	Strategic lever	Showing the CFO what is owed and why converts partner activity into a receivable financial obligation	Estimated-liability accuracy	Phase 16	6–18 mo	Medium		
G164	M. Finance, Compliance & Risk	Reconciliation & payable	Strategic lever	Reconciling obligations against finance systems prevents payment errors and cost of missed payments	Reconciliation exceptions;	Phase 20	6–18 mo	Medium		
G165	M. Finance, Compliance & Risk	Settlement governance (no pay before approval)	Strategic lever	Governance-before-automation prevents premature or erroneous payment — the correct maturity order.	Pre-approval payouts (target 0)	Phase 20 controls	Now	Medium		
G166	M. Finance, Compliance & Risk	Refund / clawback handling	Strategic lever	Updating eligibility on refunds and cancellations prevents over-payment under usage and subscription models.	Refund-adjustment rate	Revenue Event; eligibility	6–18 mo	Medium		
G167	M. Finance, Compliance & Risk	KYB / compliance screening	Strategic lever	Partner KYB and compliance gating reduces regulatory and fraud risk before activation	High-risk partner %; screening coverage	Phase 4/5	6–18 mo	Medium		
G168	M. Finance, Compliance & Risk	Audit-defensibility by design	Strategic lever	A who/what/when/why/rule/approval trail makes every decision defensible	Audit pass rate	Audit Log	Now	Foundational		
G169	M. Finance, Compliance & Risk	Data-privacy & consent	Strategic lever	Region-aware consent on touchpoint capture (PDPL / GDPR) turns a compliance risk into a selling point	Consent coverage; incidents	Phase 9 controls	6–18 mo	Medium		
G170	M. Finance, Compliance & Risk	Sharia / structure compatibility	Strategic lever	Supporting Sharia-compliant revenue-share structures opens GCC and Islamic-finance markets global tools ignore.	Compliant-structure coverage	Agreement Rule Engine	18 mo+	Medium		
G171	M. Finance, Compliance & Risk	Dispute SLA & decision	Strategic lever	SLA-bound, evidence-backed disputes prevent executive escalation	Dispute-resolution time	Phase 19	6–18 mo	Medium		
G172	M. Finance, Compliance & Risk	Finance-confidence revenue	Strategic lever	Validating that attributed pipeline became real revenue protects the firm from partner churn and evidence	Revenue-validation confidence	Phase 15	6–18 mo	High		
G173	N. Trust, Transparency & Partner Experience	Partner-visible statements	Strategic lever	Transparency is the observable-history that sustains cooperation and reduces sunnort load.	Statement view rate; support tickets	Phase 18	Now	High		
G174	N. Trust, Transparency & Partner Experience	Rejection-reason clarity	Strategic lever	Clear, controlled rejection reasons reduce disputes and build partner trust.	Dispute rate after rejection	Statements	6–18 mo	Medium		
G175	N. Trust, Transparency & Partner Experience	Fast time-to-first-payout	Strategic lever	A quick first payout is the credible-commitment signal that activates partners.	Time-to-first-payout	Onboarding → Settlement	Now	Medium		
G176	N. Trust, Transparency & Partner Experience	Self-service partner portal	Strategic lever	Self-service claim, status, and dispute handling reduces friction and manual support.	Portal activation rate	Portal	Now	Medium		
G177	N. Trust, Transparency & Partner Experience	Predictable rules of engagement	Strategic lever	Clear rules of engagement reduce conflict and raise partner investment.	ROE acknowledgment rate	Onboarding; rulebook	Now	Medium		
G178	N. Trust, Transparency & Partner Experience	Partner-satisfaction instrumentation	Strategic lever	Measuring partner satisfaction predicts activation and retention and guides program fixes.	Partner-satisfaction score	Statements; cadence	6–18 mo	Medium		
G179	N. Trust, Transparency & Partner Experience	Onboarding-to-activation acceleration	Strategic lever	Faster activation shortens time-to-value for both vendor and partner.	Invite-to-activation time	Phase 8	Now	Medium		
G180	N. Trust, Transparency & Partner Experience	Partner enablement & certification	Strategic lever	Enablement reduces rejected claims and weak evidence, improving attribution quality at the source.	Certification completion; claim quality	Onboarding	6–18 mo	Medium		
G181	N. Trust, Transparency & Partner Experience	Two-way dispute fairness	Strategic lever	A fair, visible process reduces the need to escalate, protecting relationships and reducing cost.	Dispute recurrence	Phase 19	6–18 mo	Medium		
G182	N. Trust, Transparency & Partner Experience	Recognition & leaderboard mechanics	Strategic lever	Non-monetary recognition (a cheap currency) boosts partner engagement and loyalty.	Engagement lift	Statements / portal	18 mo+	Medium		
G183	O. Defensibility & Network Effects	Attribution-model network effects	Strategic lever	More partners, events, and agreements yield a richer, more accurate attribution model	Model accuracy vs data volume	Attribution Hub	6–18 mo	High		
G184	O. Defensibility & Network Effects	System-of-record lock-in	Strategic lever	Once partner truth lives in the ledger, switching means re-deriving everything from scratch	Data gravity; switching cost	Claim Ledger	6–18 mo	High		
G185	O. Defensibility & Network Effects	Cadence / ritual switching cost	Strategic lever	Embedding in the operating rhythm makes removal disrupt routines, not just workflows	Cadence adoption depth	Part E	6–18 mo	Medium		
G186	O. Defensibility & Network Effects	Neutrality moat	Strategic lever	A neutral position between competing platforms is defensible and hard to replicate	Multi-platform coverage	Identity resolution	6–18 mo	High		
G187	O. Defensibility & Network Effects	Compliance-specific moat	Strategic lever	Jurisdiction-specific compliance is unglamorous, hard to replicate, and defensible	Jurisdiction coverage	Compliance layer	6–18 mo	Medium		
G188	O. Defensibility & Network Effects	Finance-trust moat	Strategic lever	Once finance trusts and owns the system, displacement risk drops sharply	Finance-owned deployments	Evidence pack	6–18 mo	High		
G189	O. Defensibility & Network Effects	Standard-setting via ecosystem	Strategic lever	Publishing the attribution methodology sets a category standard	Methodology adoption / citation	Scoring transparency	18 mo+	Medium		
G190	O. Defensibility & Network Effects	Multi-side platform effects	Strategic lever	Internalizing cross-side externalities creates compounding opportunities	Cross-side engagement	Platform governance	18 mo+	Medium		
G191	O. Defensibility & Network Effects	Data-portability trust paradox	Strategic lever	Allowing export builds trust while data gravity still locks in — trust without lock-in	Export use vs retention	BI export	18 mo+	Medium		
G192	O. Defensibility & Network Effects	Accumulated dispute-resolution history	Strategic lever	Resolved-dispute history trains better conflict prediction, reducing future disputes	Dispute-prediction accuracy	Conflict Signal	18 mo+	Medium		
G193	P. Buying Center & Procurement Dynamics	Multi-stakeholder buying alignment	Strategic lever	Aligning partnerships, sales, finance, and legal on shared KPIs unblocks the complex sale (70% of misaligned teams see longer sales cycles)	Stakeholder alignment; cycle length	Cadence; exec pack	6–18 mo	Medium		
G194	P. Buying Center & Procurement Dynamics	CFO as economic buyer	Strategic lever	Positioning to the CFO (payout liability, rev-rec, ROI) accesses the durable budget that survives downturns.	CFO-sponsored deals	Evidence pack; P&L	6–18 mo	High		
G195	P. Buying Center & Procurement Dynamics	Head-of-Partnerships	Strategic lever	The Head of Partnerships is the natural champion; arming them with evidence and metrics	Champion engagement	Cadence; dashboards	Now	Medium		
G196	P. Buying Center & Procurement Dynamics	RevOps as integration owner	Strategic lever	RevOps owns CRM and data; winning them secures clean integration	RevOps sponsorship	Integration layer	Now	Medium		
G197	P. Buying Center & Procurement Dynamics	Procurement-velocity	Strategic lever	Tying value to procurement efficiency (faster cycles) reaches CPO	Cycle-time reduction	Marketplace; ERP	6–18 mo	Medium		
G198	P. Buying Center & Procurement Dynamics	Board-level partner KPI tie-in	Strategic lever	Feeding board-reported partner KPIs (marketplace ARR %, ecosystem NRR) makes the product board-relevant.	Board-pack inclusion	Exec pack	18 mo+	Medium		
G199	P. Buying Center & Procurement Dynamics	Legal / compliance enablement	Strategic lever	Making legal's job easier (agreement rules, audit) removes a common deal blocker	Legal-cycle time	CLM integration; rulebook	6–18 mo	Medium		
G200	P. Buying Center & Procurement Dynamics	Cross-functional shared dashboard	Strategic lever	A shared partner-revenue dashboard aligns functions and accelerates decisions	Shared-dashboard adoption	BI; exec pack	6–18 mo	Medium
